DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Rife 6,075,699.

Rife discloses a heat sink assembly used in a semiconductor device (see column 4, lines 14-18). The assembly comprises vertical legs (30), retaining members (32), and circuit board (34).

With respect to claim 6, Rife discloses circuit board (34) as a base plate with holes (36) as a mounting hole. Heat sink assembly (10) comprises a mounting member (12), which has vertical leg bodies (30) to mount into holes (36). The retaining members (32) are contact portions brought into elastic contact with lower edge of hole (36). Slanted portion (48) is the slope that slopes out-downward from the side of the vertical leg (30).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rife 6,075,699.

With respect to claim 7, Rife discloses the device as described in the discussion of claim 6. However, Rife does not explicitly disclose the sloping angle of the slope to a horizontal plane being 45 degrees or less. Such is known and would have been obvious to incorporate into slanted portion (48), as it would allow for easier insertion of the device (10) into the holes (36) of the circuit board (34).

Allowable Subject Matter

6. Claims 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claim 8, Rife does not explicitly disclose nor suggest the use of an attachment-stabilizing piece. As a result, claims 8-12 are objected.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

McCullough 6,201,697 B1 and Kodaira et al 6,480,383 B2 disclose a heat sink assembly for semiconductor devices.
